

Schedule(Tentative)

The training course would include classroom lectures, field based learning through site visits and practical demonstrations at the World Heritage Sites of Suzhou, workshops, team projects, discussions and individual/group presentations.

The participants are supposed to work in multidisciplinary teams to learn the principles and practical know-how for conservation and restoration of wooden architectural heritage. These would help towards scientific conservation of wooden architectural heritage by taking into consideration the nature of heritage sites and the socio-economic and institutional context of respective countries of participants. Therefore, each participant will select some conservation/restoration project in his/her respective country before attending the course.

November 7 Thursday
